## MJV<sup>®</sup>-CT

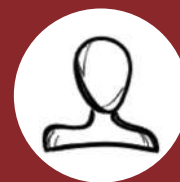

Cheek Installation & Screwing Machine-Tunnel Trunk

This machine increases the productivity of your teams thanks to the assisted insertion of the cheeks in the box and the automatic screwing. The machine is equipped with a screwing machine with automatic distribution of the screws.

The machine guarantees quality production and preserves the health of your employees by avoiding the handling of the box, painful tasks and professional diseases.

Management of U and L  
tunnel boxes

Elimination of professional  
diseases

Increased productivity

# INDUSTRIAL CARPENTRY

## TECHNICAL DATA

### Products

U and L shape tunnel trunks

### Cadence

2 minutes per trunk

### Security

Complies with Machines Directive 2006/42/EC

### Options

- Conveyor lines adapted to production needs
- Management of off-cuts boxes
- Supply of product sealant station
- Robot for palletising at the end of the line
- Compatible with MECAN'OUTIL cutting machine upstream

### Product Characteristics

Length: 600 mm - 5 160 mm

Width: up to 300 mm

Materials: Polystyrene, Aluminium, Brick, Concrete, Metal

Weight: 4 to 9 kg per linear meter

### Supplies: Power & Air

400 V Three Phase + Neutral (50 Hz)

Pressure 6 bars dry air

### Machine dimensions (excluding conveyor belt)

8 400 mm x 3 900 mm  
length width
