

INDUSTRIAL CARPENTRY

MPJ[®]-Jt

Gasket laying and cutting machine

(Pulled gaskets: brush, broom, rubber)

This machine increases productivity by automating the installation and cutting of gaskets.

A motorized reel prevents the gasket from being stretched and ensures that the gasket is cut to the right length.

The MPJ[®] guarantees quality production and a safe environment for the operator.

Saving of
production time

Gasket cutting
accuracy

High speed Production

Support for different
types of joints

INDUSTRIAL CARPENTRY

TECHNICAL DATA

Product

Aluminium & Wood

Cutting system

Scissors

Cutting precision

+/- 2 mm depending on the application

Consumables

Gasket application tool, blade

Options

- Possibility of accumulation tables in entry and exit of the laying machine
- Number of jointing tools according to the number of joints

Gasket laying speed

Upright posts (2 200 mm and +): 9 m/min

Sleepers (730 mm and +): 4,5 m/min

Type of cut

at length | over-length

Supplies: Power & Air

400 V Three phases + Neutral (50Hz)

Pressure 6 bars dry air

Machine dimensions

Machine: 3 950 mm x 600 mm x 1 300 mm
length width height

Gasket Reels: 1 000 mm x 1 150 mm x 1 300 mm
length width height

Security

Complies with Machines Directive 2006/42/CE
